JobTestPrep's Numerical Reasoning Formulas

Although taking a numerical reasoning test is not the same as taking a maths exam, in order to succeed on a numerical test you will need to have mastered some basic maths skills.

Numerical tests usually target the following mathematic skills:

1. Addition
2. Subtraction
3. Multiplication
4. Division
5. Averages
6. Percentages
7. Ratios

More advanced calculations, such as averages, percentages and ratios can become simpler with the use of specific formulas. Such is the case with algebraic questions that involve rate problems (work/ speed/ distance/ time) as well as financial-oriented problems.

In this PDF we offer a short guide to basic as well as advanced formulas that you are expected to be able to apply in your numerical test. We will focus on the following subjects:

1. Averages
2. Percentages
3. Ratios
4. Rate formulas
5. Finance
