### Easy-To-Use Interface.

**We'll take you through the authoring process, step by step.**

The first thing you'll see is the Startup Launcher window. From here, you can choose what type of project format you want to create. Once you start a new project, the Source Wizard guides you through the process of importing your clips or photos. You can edit your clips in the Edit Stage, then create your menu in the Menu Stage. Test your project virtually in the Simulation Stage, and finally, output and burn your project to disc in the Output Stage.
